

Seven Great Reasons to Subscribe to HHIE's Health eNet

Be a part of the next evolution in electronic health records.

One login. More data from more sources. One inclusive fee.

This translates into greater efficiency, improved productivity, and better patient outcomes.

1

Lab Results CHR

- One interface works across the board
- All outpatient results from Clinical Labs of Hawaii and Diagnostic Lab Services, regardless of who orders the test
- Real-time lab results
- Health eNet subscription includes all updates, development and support

EHR

- Two interfaces required to receive lab results
- Limited lab results
- Most show only what was ordered, not other providers' results, even if on the same EHR
- Delayed lab results (in a typical 2-3 daily scheduled delivery)
- Annual updates required
- Development and support costs

2

Medication Query CHR

- Multiple data contributors
- Includes Mail Order Rx
- Shows when patient picked up order

EHR

- Limited access from benefit manager
- Shows only that pharmacist wrote the order, not if patient picked it up or what other providers have ordered

3

Operative Reports, Discharge Summaries, Pathology Reports CHR

- All op, discharge and path reports viewable in one place
- Cuts costs, save time and need for follow-up

EHR

- Multiple logins needed from numerous hospitals to view all op, discharge and path reports

4

Face Sheets CHR

- Health eNet has access to hospital FS
- Includes updated insurance information

EHR

- No access to hospital FS
- Must send FS by fax or login separately to each hospital

5

Quality Measures CHR

- Access to public health data
- CCD can be created, exported and uploaded into your EHR for maximum data, including labs

EHR

- Limited access to data
- Interface has additional cost
- Results must be keyed in manually to get structured data

6

Transitions of Care Direct Secure Messaging CHR

- Instant database of our DSM addresses
- Attach and send a CCD
- Send CCD to public health registries

EHR

- HISP required for additional fee
- Limited; both parties must have an HISP and direct secure address
- Testing is strongly advised
- IT vendor required for setup, testing, maintenance and support

7

Transitions of Care Electronic Referrals Network CHR

- Refers across all EHR systems
- Attach and send a CCD
- Less time spent calling, faxing, leaving messages, waiting for call back, etc.
- Monitor a referral in process: when accepted, scheduled, completed
- One-to-one conversation between referring and receiving providers

EHR

- Must fax the referral to each EHR
- No instant feedback on whether fax was received. Must call to confirm
- Doesn't count toward Meaningful Use as an electronic HIE

Patient Data is Flowing!

We are moving forward! Through the support and participation of Hawai'i's major healthcare providers, the Hawai'i Health Information Exchange continues to make progress in providing a secure hub for patient data. As more healthcare providers contribute to the Community Health Record, we will have a one-stop, single sign-on system to improve clinical decision-making, enhance care and deliver better health outcomes for patients.

Participating Facility	Available Data	Demographics	Admission Discharge Transfer	Laboratory	Pathology	Radiology Reports	Transcribed Reports	Medication History
Castle Medical Center	July 2015 - Present							
Clinical Laboratories of Hawai'i	Nov 2013 - Present							
Diagnostic Laboratory Services	Dec 2014 - Present							
Hawai'i Health Systems Corporation-East Hawai'i - Hilo Medical Center - Ka'u Hospital* - Hale Ho'ola Hamakua* * pending interface implementation	Sept 2014 - Present							
Hawai'i Health Systems Corporation-West Hawai'i - Kona Community Hospital - Kohala Hospital	Apr 2014 - Present							
Hawai'i Health Systems Corporation-Maui County - Maui Memorial Medical Center - Kula Hospital - Lana'i Community Hospital	Apr 2014 - Present							
Hawai'i Health Systems Corporation-Kaua'i County - Kauai Veterans Memorial Hospital - Samuel Mahelona Memorial Hospital	Apr 2014 - Present							
Hawai'i Pacific Health - Kap'iolani Medical Center for W&C - Pali Momi Medical Center - Wilcox Memorial Medical Center - Straub Clinic and Hospital	Jan 2014 - Present							
The Queen's Health Systems - Queen's Medical Center - Queen's Medical Center West - Molokai General Hospital - North Hawaii Community Hospital* * pending Epic implementation	May 2015 - Present							
Health Care Systems (ambulatory medication fill history across the U.S.)	Past 12 months							

Connected!

Hawai'i's major healthcare providers are sharing patient data to build the Hawai'i Health Information Exchange's Community Health Record. Ultimately, everyone benefits!

Kaua'i
