Coreo Release Notes
June 1, 2018

New Features
New Medicare Star Measures

The following Medicare measures are available June 1, 2018, in Coreo^{TM}. This measure set includes:
1. **Disease-modifying anti-rheumatic drug therapy for rheumatoid arthritis (ART).**
2. **Osteoporosis management in women who had a fracture (OMW).**
3. **Medication adherence for diabetes medication.**
4. **Medication adherence for hypertension (RAS antagonists).**
5. **Medication adherence for cholesterol (statins).**

To access the Medicare Star measures, go to the PCP Performance page in the Performance module. Go to the Measure Program drop down menu and select MA STAR Measures Program-2018. The new Medicare Star measures aren't included in the payment transformation program.

At the patient level, you'll also see care gaps for these measures when the member is noncompliant. You'll also have the option to enter supplemental data.

If you'd like more information about these measures, please visit the HMSA Provider Resource Center at
https://hmsa.com/portal/provider/zav_pel.aa.MED.100.htm

Payment Transformation
1. **Review of Chronic Condition (RCC) Supplemental Data Forms and Care Gaps**
    a. The RCC measure requires each PCP to review a subset of HCC conditions for eligible Medicare Advantage members each year. Each unaddressed RCC condition is now rendered as an open care gap in the Care Gap tab of the Patient Details page and the Care Gap page in the Tasking module. Providers must have a face-to-face visit during the measurement year and confirm an existing diagnosis via a claim to receive numerator credit. Diagnoses pulled from integrated EHRs don't count for this measure.
    b. PCPs also have the option to disconfirm conditions that have improved, been resolved, or for which there is insufficient evidence that the patient has the condition. Disconfirmations must be submitted through the supplemental data forms, which are accessible through the clipboard icon next to each RCC condition in the Care Gaps list.
    c. HMSA continues to work with Coreo to refine the denominator measure logic to automatically exclude conditions that were coded exclusively by certain provider specialties. We'll notify providers when a logic change is made.
    d. For more information about the RCC measure, see the *Payment Transformation Program Guide.*
2. **PO Engagement Measure: Providing 24/7 Coverage for Attributed Members**
    a. Each quarter, POs are required to submit one attestation form reporting the types of coverage the PCPs in the PO use and the number of PCPs that use each method.
    b. The attestation form is now available in Coreo.
    c. PO leaders should click on the measure name, Conduct Assessment, open the drop-down menu in Select Assessment, select Providing 24/7 Coverage for Attributed Members and then click Start.

    d. To review completed assessments, click History on the Assessments page.

    e. Once an assessment is submitted, it will take an overnight refresh of the measure to determine if the PO is compliant or not.

    f. POs may submit more than one assessment per quarter, but only one submission is required.

    g. For more information about the measure requirements, see the *Payment Transformation Program Guide.*
