

Care Management

eClinicalWorks Care Plan establishes a holistic view of each patient and includes overall health and wellness, from lifestyle and activities of daily living to home and community supports. Collaborative care planning with all care team members, the patient, and their family or caregivers is the cornerstone of patient-centric care.

Member Management: Member enrollment, care team assignment, program management

Identify and Manage Risk: Health assessment, risk stratification, gaps in care

Care Plans: Customizable care plans to monitor progress, patient action plans

Productivity tools: Dashboards for tasks, reminders, referrals, messaging, and reports

Integrate Behavioral Health within your practice

- **Goal Tracking:** Assign, track and monitor progress toward goals for your patients.
- **Care Plan Reviews:** Set up automated reviews for patient and care team to receive reminders when the Care Plans are due for review.
- **Patient and Care Team Sign-offs:** Capture signatures from patients and care team members.
- **Schedule Management and Group Visits:** Easily schedule and document group visit encounters on multiple patients.
