

East Hawaii IPA

2019 East Hawaii IPA Healthcare Symposium
Advancing Care for Patients, Providers and Communities
August 16, 17 & 18, 2019
Fairmont Orchid Hawai'i Hotel, Waikoloa

Improving patient health and well-being and managing the cost of our healthcare system requires a multi-faceted approach and collaboration across a wide range and variety of institutions and individuals. Collaborative partnerships between individual providers, health plans, government payors, and community service agencies and changes in the way care is delivered at the clinic level are critical to success. At this conference, we will explore new ways of delivering care by leveraging community wide resources and specialties. We will reflect upon the toll that system transformation has on providers and how to manage the pressures. The conference will bring together national and local leaders to share ideas and tools for improving patient engagement and clinical outcomes and search collectively for ways to minimize wasteful healthcare spending.

SCHEDULE

**Speakers and topics subject to change*

Friday, August 16, 2019
